

## Minutes for July 6, 2006

### Old Business:

#### ITAB Report

Chris Wilkerson is seeking feedback on the June 15 Digital Government Summit. Send comments to: [chris.wilkerson@oa.mo.gov](mailto:chris.wilkerson@oa.mo.gov).

Gary Lyndaker is looking into some enterprise licensing for Macromedia Contribute. (More related information later in the minutes)

#### State Web Standards Subcommittee (formerly Brown University Study)

Lynn reported that they are continuing discussion on standardized definitions

The Google search appliance will selectively allow the indexing of Webpages using query syntax (including question marks) Send questions about this to [Lynn.McKee@oa.mo.gov](mailto:Lynn.McKee@oa.mo.gov) or one of the subcommittee members.

Ron reported that the inventory of online services still needed to be completed by most agencies. ONE UPDATE: these need to also include INTERNAL online services (housed on your intranet, for example).

### New Business:

#### Collaborative Presentation Idea: DMD and Windev Group

Testing accessibility in Visual Studio.NET 2005/2003 - Test Case

James Brockman, Windev group member, was present at the meeting. Lainie and James explained the idea behind the project. This project is to create a hypothetical Web application and test the two different version of VS.NET to see how well it handles and codes for accessibility. A sheet was passed around for volunteers from DMD. We will keep you posted on the progress of that project.

#### State Homepage Links Review

All agencies: please review links on second-level pages of the state homepage to ensure the links are accurate, organized and complete. Send any additions/deletions/corrections to: [oahelpdesk@oa.mo.gov](mailto:oahelpdesk@oa.mo.gov). It was also suggested to review all the different topic areas of the site, (business, learning, living, etc). There may be areas that your agency currently does not provide links that you may find relevant.

#### Content Management Software Use

Please submit to [ron.thomas@oa.mo.gov](mailto:ron.thomas@oa.mo.gov) the following information regarding any Content Management software your agency is currently using. This will help to determine what kind of enterprise licensing we can research and offer to agencies.

- Product Name
- Vendor
- Software Version/Level
- Contract Number
- Licensing Dates, expiration, renewal options
- Cost
- Enterprise Expansion Options

### **Quick Survey Results - Web Development Tools**

Lainie passed out the results to the Web Development tools Quick Survey. We received 20 responses. The trend seems to be Dreamweaver, Contribute, Websphere and Visual Studio.NET.

### **Agency Projects/Open Discussion:**

**DESE** implemented it's year long project of the changes to the School Funding formula that passed last year. The changes moved to production June 23.

Amy Wicks with the **Department of Corrections** announced their new Law Enforcement Notification System developed in Websphere that they recently implemented.

**Lottery** has purchased a commercial Survey software (Opinio)

<http://www.objectplanet.com/opinio/>

It is written in Java. They have found it to be very functional right out of the box and very extendable. The interface is user-friendly enough to allow their non-IT staff (research staff) to develop surveys with it. They will be able to integrate the surveys into their MyLottery personalization feature of their Website.

Rodney has offered to do a demo of the product at a future meeting. There was interest by the members.

**Business Portal Project** - this project has been revitalized and is currently being prototyped. Several agencies, including agencies not part of the consolidation, are collaborating on this project. It will be written in either Websphere or .NET.

\*\*\*\*\*

Next monthly meeting is August 3 from 1:30 pm to 3:00 pm Truman Building **Room 493. NOTE CHANGE OF LOCATION.**
